#### **Management Commentary**

Daniel T. Accordino, Chairman and Chief Executive Officer of Carrols, commented, "Our favorable Burger King comparable restaurant sales performance during the fourth quarter of 2021 was driven by average check growth of 12.1%, inclusive of menu price increases and lower promotional activity, partially offset by a traffic decline of 4.2%. Our Burger King restaurants also demonstrated strong sequential improvement in comparable restaurant sales until the last two weeks of December, when we believe the initial impact of the Omicron variant began slowing sales trends. Compared to the fourth quarter of 2019, the Company's Burger King quarterly comparable restaurant sales rose 7.0%. From a cost perspective, in the latest quarter we continued to see meaningful headwinds with respect to commodity and labor cost inflation similar to what we experienced during the third quarter of 2021."
